

## Innovations are made by ideas

Our strength lie in the realization of technology, know-how and innovational energy.

EKONS is innovative and creative, or qualified team works out customized solutions. We produce ideas as raw material. And this according to your demands, from the idea to the complete product or in any variation.

Wir liefern Komplettlösungen für Ihre Automatisierung

**Competent, reliable, professional**

**SIEMENS**

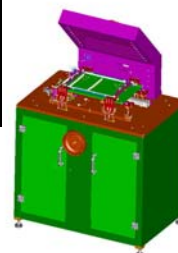

With EKONS as a your partner for construction and develop service you still remain flexible on the certified quality-level in case of order peaks and personal narrows.

We work for **automobile** and **mechanical-engineering-industry** companies in the whole range of **product-developing** and **production**. From the idea over the construction up to the planning of whole assembly lines for product-end-processing.

As responsible developing partner together with our customers we work out close-to-production und practice-oriented solutions. We accompany the whole development process: From the concept phase, construction, simulation over the tryout to the complete serial-product. The use of innovative material-, function-, and component-concepts is feature of our daily work.
